About the Seminar

The Indian Knowledge System (IKS) as reflected in Vedic and Post-Vedic literature embodies a highly interdisciplinary approach, integrating diverse fields such as philosophy, linguistics, astronomy, medicine, mathematics and arts. The Vedic texts, including the Ṛgveda, Yajurveda, Sāmaveda, and Aṭharvaveda, provide foundational knowledge on cosmology, ethics, and rituals while simultaneously embedding scientific principles within their hymns. The Vedāṅgas and Upaniṣads further expanded intellectual inquiry, connecting disciplines like grammar (Vyākaraṇa), astronomy (Jyotiṣa), and logic (Nyāya) to spiritual and metaphysical thoughts. Knowledge in ancient India was not confined to isolated disciplines but encouraged a seamless confluence of theoretical and applied sciences, laying the groundwork for comprehensive learning. National Education Policy (NEP) 2020 emphasizes a multidisciplinary and holistic approach to education, revisiting the interdisciplinary dimensions of IKS. The Post-Vedic period saw the emergence of specialized treatises like Āyurveda, Arthaśāstra, and Nāṭyaśāstra, demonstrating the synthesis of empirical research, governance, and creative expression. By incorporating the wisdom of Vedic and Post-Vedic texts into contemporary curricula, NEP 2020 seeks to nurture critical thinking, innovation, and a culturally rooted yet globally relevant education system, reinforcing India's intellectual legacy in a modern context where traditional wisdom and modern scientific advancements complement each other and where India's rich knowledge heritage aligns with global educational paradigms emphasizing cross disciplinary learning to empower students with a complete, culturally rooted, and futuristic intellectual foundation. Indian Knowledge System also emphasizes the interconnection between knowledge, society and sustainable living, as reflected in ancient texts. NEP 2020 envisions an education system that not only imparts technical skills but also nurture moral and social responsibility.
